DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 27-28, 30-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Jordan, Jr. (U. S. Pat. 5,743,025).

Jordan shows a main body portion including a top 14, a bottom 16, opposing sides 20, 22 and rear wall 18 portions defining an interior chamber. The main portion 20 includes a latticework frame with openings. A door member 24 connects to the main body portion. The door member is formed from a latticework frame with openings. The pivotal door member being adapted to selectively retains a volatilizable material within the interior of the main body. A drying airflow is adapted to pass through the interior chamber when the media holder assembly is positioned in an air passage of a laundry dryer. With regard to claim 30, any openings may serve as a handle element. For claims 31, 33, see elements 28 as guide element. For claim 34, see door latch 26.

Allowable Subject Matter

3. Claims 1-26 are allowed.

Art Unit: 3749

4. Claims 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 1/27/2004 have been fully considered but they are not persuasive. First, broad claims presented failed to structurally define over the prior art reference. Claims 27, 28 and 30-34 remain structurally met by the patent to Jordon, Jr. U.S. Pat. 5743025. The examiner would not give any patentable weight to the material being held by the holder assembly which is "adapted to be removeably placed" in an air passage of a laundry dryer. Second, the applicant also argued that the Jordon patent is for drying sneakers in a drying chamber but not in a laundry dryer. This line of arguments is not persuasive because the sneakers drying chamber of Jordon and the claimed launder dryer both have a same structure and perform the same drying functions. Third, the door member of Jordan clearly being adapted to retain a volatilizable material. The applicant also argued that the reference does not show the claimed features of claims 31-34. The examiner wishes to direct the applicant's attention to elements 28 as equivalent to claimed guide element. For claim 34, the door latch 26 is same as the claimed door releasably latching means in claim 34.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

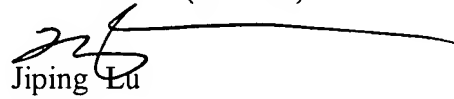

Art Unit: 3749

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
